

# MICHIGAN'S WOOD BIOMASS INVENTORY

ANTHONY WEATHERSPOON

Michigan Department of Natural Resources

Forest Mineral and Fire Management

MARCH 14, 2007

# Forest Resource Management

- Gather, Analyze & Disseminate Relevant Information
- Make the tie to Sustainable Management & Community Economic Growth
- Management Responsibilities for 3.9 Million Acres of State Forest Lands

# Partners

- Michigan State University
- USDA Forest Service
- Michigan Technological University
- Michigan Biomass Energy Program
- SE Michigan RC&D Council
- Industry and Other Interested Parties

# Why Wood Resource Inventories are Needed

Will show:

- Best economic options for processing & recycling wood
- Data for long-term, sustainable business plans
- Opportunities for new markets

# Presentation Overview

- What is Woody Biomass
- Sources of Woody Biomass
- Current Uses & Markets for Woody Biomass
- Other Issues Related to Woody Biomass
- The Future

# What is Woody Biomass

- Biomass is simply any organic material – living or dead
- Woody biomass includes entire living & dead trees, brush, stems, logs & residue material generated throughout various forest product processing

# Woody Biomass

Forest product industries normally focus on a portion of the forest resource – sawlogs & pulpwood – without looking at other value added markets, such as:

- Tops, limbs, & brush
- Small diameter timber
- Wood manufacturing residues
- Urban wood

These are key opportunities for biomass energy.

# Woody Biomass Sources

# TOTAL WOODY BIOMASS ON TIMBERLAND IN MICHIGAN \*

(2005 FOREST INVENTORY ANALYSIS)

\* Physical Presence of Biomass Not Biomass Availability

# Woody Biomass Availability

- Land owner Values (over half is on private lands)
- Price
- Sustainable requirements
- Competing Uses
- Changing Markets

# Additional Biomass Potential

- Utilization of Non-Commercial Species  
(not in FIA Data)
- Hybrid Plantations (e.g. hybrid poplar, willow)

# WOODY BIOMASS ON TIMBERLAND IN MICHIGAN (2004 FIA)

- MERCHANTABLE BIOMASS ON GROWING STOCK ON TIMBER LAND' (MILLION TONS)
- TOPS LIMBS STUMPS ON GROWING STOCK ON TIMBER LAND' (MILLION TONS)
- MERCHANTABLE BIOMASS ON CULL ON TIMBER LAND' (MILLION TONS)
- TOPS LIMBS STUMPS ON CULL ON TIMBER LAND' (MILLION TONS)

## WOODY BIOMASS ON TIMBERLAND IN EASTERN UPPER PENINSULA OF MICHIGAN (2004 FIA)

- MERCHANTABLE BIOMASS ON GROWING STOCK ON TIMBER LAND' (MILLION TONS)
- TOPS LIMBS STUMPS ON GROWING STOCK ON TIMBER LAND' (MILLION TONS)
- MERCHANTABLE BIOMASS ON CULL ON TIMBER LAND' (MILLION TONS)
- TOPS LIMBS STUMPS ON CULL ON TIMBER LAND' (MILLION TONS)

**WOODY BIOMASS ON TIMBERLAND IN  
WESTERN UPPER PENINSULA OF MICHIGAN (2004 FIA)**

- MERCHANTABLE BIOMASS ON GROWING STOCK ON TIMBER LAND' (MILLION TONS)
- TOPS LIMBS STUMPS ON GROWING STOCK ON TIMBER LAND' (MILLION TONS)
- MERCHANTABLE BIOMASS ON CULL ON TIMBER LAND' (MILLION TONS)
- TOPS LIMBS STUMPS ON CULL ON TIMBER LAND' (MILLION TONS)

**WOODY BIOMASS ON TIMBERLAND IN  
NORTHERN LOWER PENINSULA OF MICHIGAN (2004 FIA)**

- MERCHANTABLE BIOMASS ON GROWING STOCK ON TIMBER LAND' (MILLION TONS)
- TOPS LIMBS STUMPS ON GROWING STOCK ON TIMBER LAND' (MILLION TONS)
- MERCHANTABLE BIOMASS ON CULL ON TIMBER LAND' (MILLION TONS)
- TOPS LIMBS STUMPS ON CULL ON TIMBER LAND' (MILLION TONS)

# WOODY BIOMASS ON TIMBERLAND IN SOUTHERN LOWER PENINSULA OF MICHIGAN (2004 FIA)

- MERCHANTABLE BIOMASS ON GROWING STOCK ON TIMBER LAND' (MILLION TONS)
- TOPS LIMBS STUMPS ON GROWING STOCK ON TIMBER LAND' (MILLION TONS)
- MERCHANTABLE BIOMASS ON CULL ON TIMBER LAND' (MILLION TONS)
- TOPS LIMBS STUMPS ON CULL ON TIMBER LAND' (MILLION TONS)

**Table 3—Annual Biomass Quantities in Michigan (est. dry tons), by Type and Delivered Price<sup>47</sup>**

Biomass Type	< \$20/dry ton	< \$30/dry ton	< \$40/dry ton	< \$50/dry ton
Urban Wood Residue	495,734	826,224	826,224	826,224
Mill Residue	10,000	932,000	1,248,000 (est)	1,564,000
Forest Residue	0	710,000	1,034,000	1,327,900
Energy Crops	0	0	1,154,228	4,179,308
Ag Residues	0	0	680,783	4,265,671

Simpkins, Dulcey. 2006. Clean Energy from Wood Residues in Michigan.  
Michigan Biomass Energy Program.

# Woody Biomass Resource Current Uses & Markets

# Primary Mills

While many mills utilize or market their own residues, others remain a potential source of additional woody biomass.

# Urban Wood Residue Sources

- Tree removals & trimmings (logs, limbs, stumps)
- Manufacturing byproducts (edgings, cutoffs, chips, shavings)
- Discarded packaging (pallets, skids, crates, dunnage)
- Construction/demolition
- Railroad ties
- Telephone poles

# MI Urban Wood Estimates

## 2007 SEMIRCD Study – Sherrill & MacFarlane

- Studied green & brown urban wood residues
- To be released in spring 2007

## 1994 Public Policy Associates study –

### *Urban Wood Waste in Michigan Supply & Policy Issues*

- 659,328 tons, 45% utilized
- 8,848,527 MBtus

## 1999 Oak Ridge National Laboratory study –

### *Biomass Feedstock Availability in the U.S.*

- Estimated 826,224 dry tons/yr
- Delivered price of <\$30/dry ton

# Biomass Energy from Wood

- Renewable
- Local
- Reliable
- Sustainable
- Affordable
- Low carbon emission
- Minimal ash
- Very low metals and sulfur

- **Good option for schools, hospitals, and other institutions facing high energy costs**
- **Can be used through new construction or boiler retrofit**

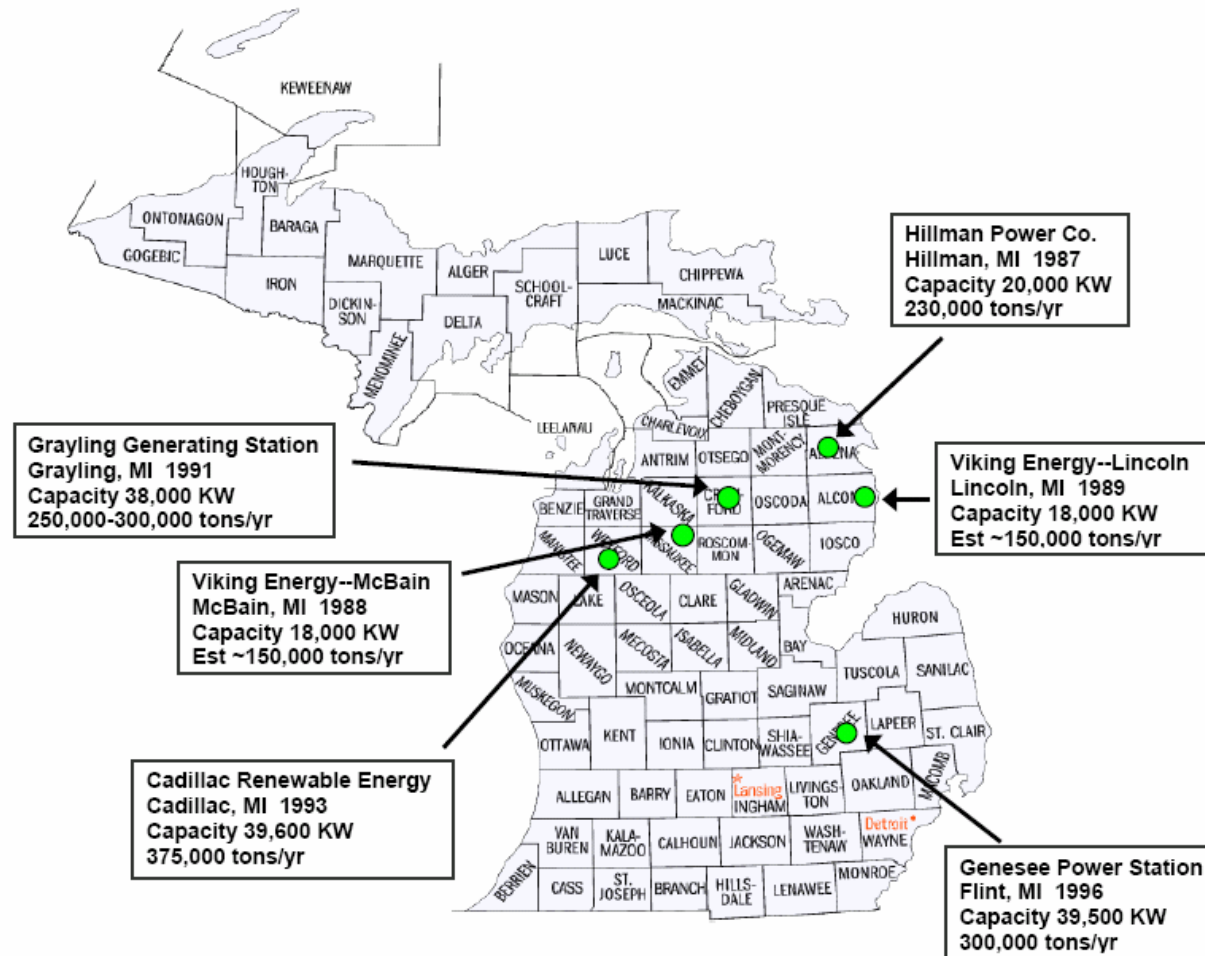

**Table 2—Wood Energy Characteristics, Merits, and Technology Options**

Resource	Energy Characteristics	Advantages	Disadvantages	Technology
Wood and wood residue	<ul style="list-style-type: none"> <li>▪ green wood: 4,800 Btu/lb (45% moisture content, wet basis)</li> <li>▪ dry mill residue (brown wood): 6930 btu/lb (13% moisture content, wet basis)</li> <li>▪ pellets or briquettes: 8000-9000 btu/lb (8% moisture content, wet basis)</li> <li>▪ wood-to-ethanol life cycle fossil energy ratio: 14-29:1</li> </ul>	<ul style="list-style-type: none"> <li>▪ renewable, locally abundant</li> <li>▪ dispatchable (storable), not intermittent (solar, wind)</li> <li>▪ known technology for heating, boilers, co-firing</li> <li>▪ much cleaner than coal, carbon neutral if harvested sustainably</li> <li>▪ pollution prevention for wood industry and processing</li> <li>▪ prevents landfilling of organics</li> <li>▪ improved forest health, reduced impact of fires, insects, diseases</li> </ul>	<ul style="list-style-type: none"> <li>▪ lower energy content than non-renewable fossil fuels</li> <li>▪ can be expensive to transport</li> <li>▪ requires storage space</li> <li>▪ must be dried for some energy applications</li> <li>▪ can be contaminated</li> <li>▪ lack of consensus on sustainability</li> </ul>	<p><b>NOW</b></p> <ul style="list-style-type: none"> <li>▪ wood fired boilers</li> <li>▪ wood and coal co-fired boilers</li> <li>▪ co-firing with other biomass</li> <li>▪ pyrolytic oils (bio-oils)</li> </ul> <p><b>FUTURE</b></p> <ul style="list-style-type: none"> <li>▪ wood-to-ethanol</li> <li>▪ syn-fuels</li> </ul>

Simpkins, Dulcey. 2006. Clean Energy from Wood Residues in Michigan. Michigan Biomass Energy Program.

# Wood Energy Facilities in Michigan

**Table 1—Facilities Producing Wood Energy in Michigan**

Source: REPiS, online at <http://www.nrel.gov/analysis/repis/>.

Type	Capacity (KW/year)
Michigan Total	368,170
Utility (six sites)	173,100
On-site Upper Peninsula	150,800
On-site Lower Peninsula	44,270

# Analyzing Potential for Small, Local Projects: Statewide Boiler Assessment

*Goal: Identify boilers in MI that could be converted to use woody biomass (by either retrofit or replacement)*

- Develop database listing boiler characteristics statewide
- Categorize boilers by institution/industry type
- Assess owner interest in biomass energy/conversion and identify contacts
- Prioritize candidates for conversions

*(Project of the SE Michigan RC&D, US Forest Service, Michigan DLEG Energy Office, and Michigan DNR)*

# Competing Markets

- Mulch & hydromulch
- Pulp & paper
- Wood composites
- Landfill cover
- Bulking agents
- Soil amendments
- Animal bedding
- Biofilter media
- Refurbished pallets
- Solid wood milled products

# Other Issues

- Location – distinguishing residues from waste
- Landfills and tipping fees
- Transportation
- Harvesting
- Collection
- Processing – drying, chip size requirements

# The Future

## Emerging Michigan Markets

- Fuel pellets
- Liquid fuels
- Biorefineries

# Other Resources

## Clean Energy from Wood Residues in Michigan

Michigan Biomass Energy Program  
Dulcey Simpkins, Coordinator

Discussion Paper  
June 2006

# Grant Opportunities & Events

- Woody biomass feasibility grants – funds for on-site engineering assessments in public institutions – see [www.semircd.org/ash](http://www.semircd.org/ash) for more info - DEADLINE is April 16, 2007
- Woody biomass system installation grant (up to \$65k) will be announced in May 2007 on [www.semircd.org/ash](http://www.semircd.org/ash)
- Forest Products Society event: “Expanding the Bioeconomy” at DeVos Center in Grand Rapids, May 15, 2007 – see [www.fpsgreatlakes.org](http://www.fpsgreatlakes.org) for more info

# Thank you
